Version 2.2

Introduction:

The InstantSSL Web Host Program gives you the unique ability to integrate the InstantSSL product family and TrustLogo product family into your own product offerings. In turn, share the benefits and cost-effectiveness of InstantSSL and TrustLogo with your own customers. This programme is ideal for hosting companies and ISPs with customers with SSL requirements.

Our online management system allows your administrator (and nominated users) to deposit funds to be used to purchase SSL Certificates and TrustLogo products for your customers, and to run reports on your sales made through the system. The prepayment system ensures you can start purchasing products at great discounts quickly and easily.

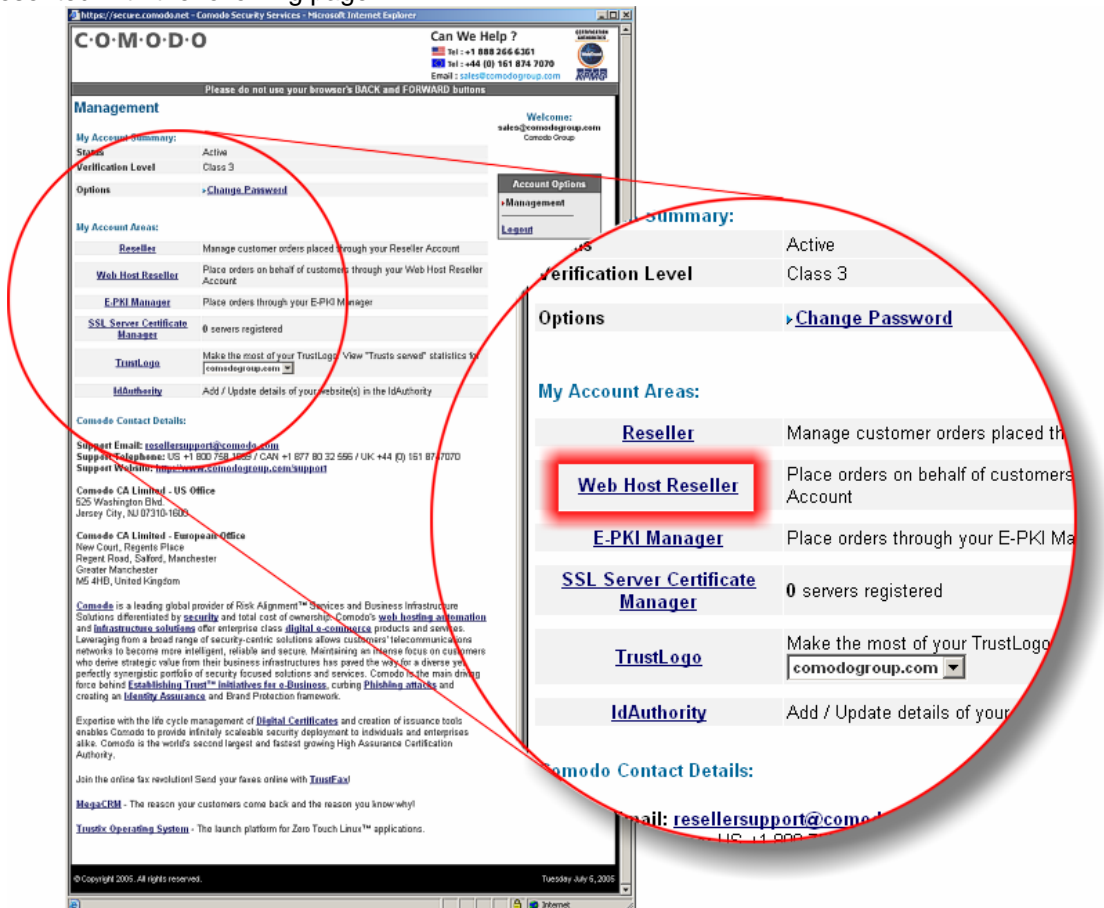

You may use the User Management facility to create new users for your EPKI account and specify permissions for Users on a granular basis, including certificate issuance, revocation and reporting permissions.

Login details:

Please find your login details in the email sent by your Account Manager. Should you need reminding of these details please contact support@comodogroup.com. Visit www.instantssl.com or www.comodogroup.com and click the "login" button the menu.

Using the Web Host area:

Once logged into the InstantSSL system, select the "Web Host Options" button. You will be presented with the following page:

COMODO Can We Help ?

Applying for a Product:

As a web host you apply for either Single domain SSL Certificates, Multi domain SSL certificates or TrustLogos on behalf of your customers.

Buying a single domain SSL Certificate:

In order to apply for a new single domain SSL Certificate, click on the SSL product name you wish to purchase. This will present the following screen:

C·O·M·O·D·O Can We Help ?
Tel : +1 888 266 6361

InstantSSL Certificate + TrustLogo

Welcome:
sales@comodogroup.com
Comodo Group

Step 1: Provide a CSR

Your Current Credit is: **\$0.00**

You must generate a Certificate Signing Request (CSR) on your webserver. [Click here](#) for help generating your CSR.

NOTE: Please ensure that the Common Name (CN) in your CSR is ONE of the following:

- your Fully Qualified Domain Name (e.g. "secure.yourdomain.com")
- your Public IP address (e.g. "202.144.8.10")
- the Full Server Name of your internal server (e.g. "techserver")
- your Private IP address (e.g. "192.168.0.1")

After you have generated a CSR using your server software **copy and paste** the CSR text using an **ASCII text editor** into the CSR box below. Your CSR should look something like this:

```
-----BEGIN CERTIFICATE REQUEST-----  
MIDUDCCArkCAQAwdTEVWMBGGA1UEAxMNdGVzdC50ZXN0LmNvbTESMBAGA1UECxMJ  
TVFya2V0aW5nMREwDwYDVQQKEwhlUZXN0IE9yZzESMBAGA1UEBxMJVGVzdCBDaXR5  
(more encoded data).....  
Rq+blLr5X5iGdzyF1pLqP1Mck5Ve1eCz0R9/OekGSRno7ow4TVyxAF6J6ozDaw7e  
GisfZw40VLT0i6iGvK2jX0i+H58RFQ8WYTOcTRIPnkG8BiuV  
-----END CERTIFICATE REQUEST-----
```

1. Copy and paste your CSR into this box:

2. Select the server software used to generate the CSR: Select from list

3. Select the validity period for your Certificate:

1 year

2 years **Highly recommended** Save 27% on our most popular option!

3 years Save 38%

Total Cost: \$112.38

Please note: Data on this company will be retrieved from IdAuthority where available to assist you with the signup.

© Copyright 2005. All rights reserved. Tuesday July 5, 2005

The cost of the Certificate as per your current buy price

To apply for a single domain SSL certificate:

- a) Generate a CSR for your customer's domain using your webserver
- b) Copy and paste the CSR into the web form
- c) Select from the list the server software used to create the CSR
- d) Select the SSL product type: either *InstantSSL*, *InstantSSL Pro*, *PremiumSSL* or *PremiumSSL Wildcard Certificate*
- e) Select the validity period for the certificate: either 1, 2 or 3 years
- f) Provide your customer's corporate details

Note:

The product type and validity period will affect the price charged for the certificate. Please refer to your pricing band for your actual buy prices as set by your Account Manager.

Buying a TrustLogo:

TrustLogo = Gives the customer the ability to display either of the following TrustLogo on their website. The Authentic & Secure version is allowed to be displayed by SSL customers, the Authentic version is for non-SSL customers.

SSL Customer Version

Non-SSL Customer Version

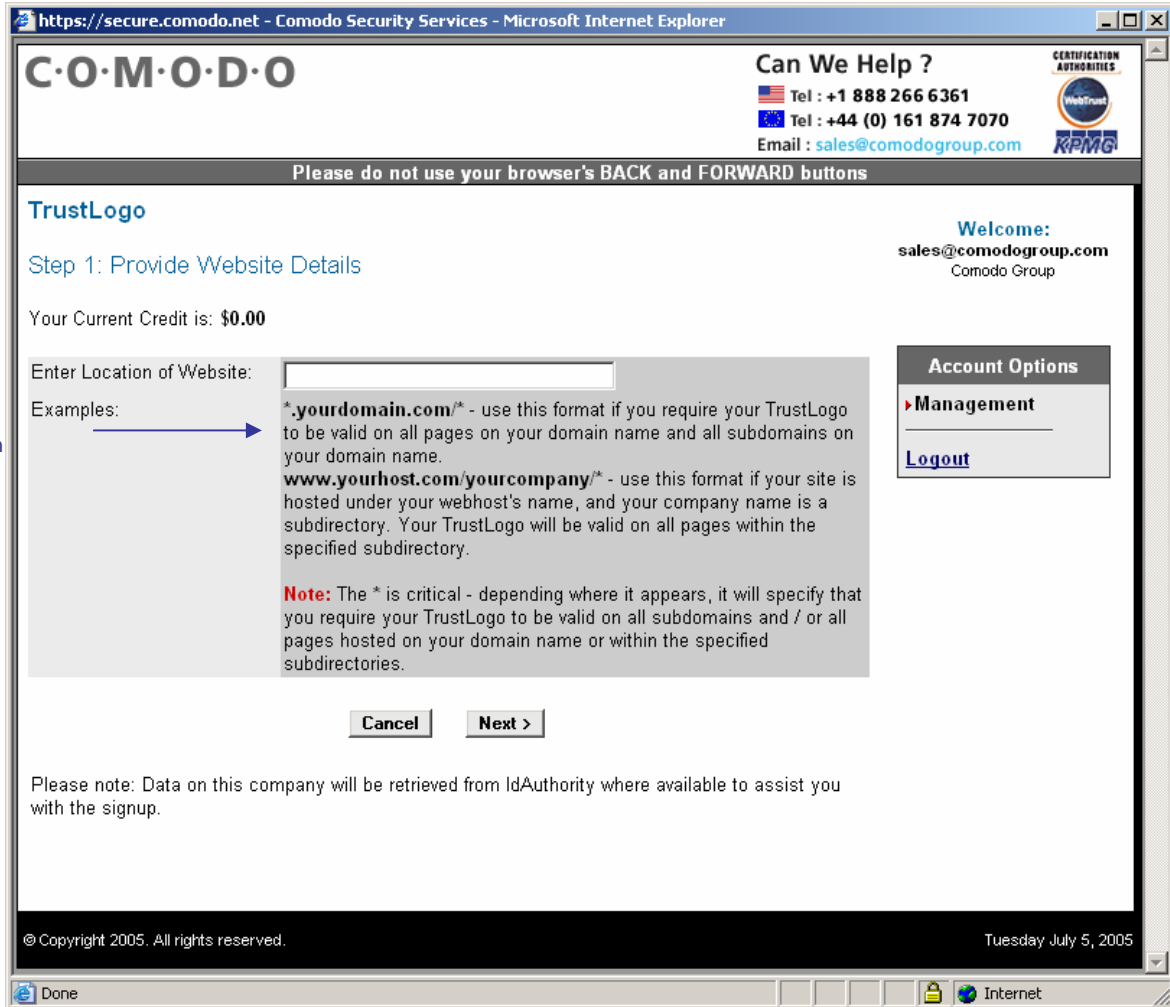

Card Payment TrustLogo = Gives the customer the ability to display the following TrustLogo on their website:

Notes:

- An activated TrustLogo or Card Payment TrustLogo provides real-time identity assurance, covered by a \$10,000 identity assurance warranty.
- If a customer has purchased both an SSL Certificate and a TrustLogo for the same domain then they will have the ability to display the SSL version of TrustLogo. If the customer has not purchased an SSL Certificate they will only be able to display the non-SSL version of TrustLogo.
- Ownership of an SSL Certificate does not affect the Card Payment TrustLogo.

In order to apply for a new TrustLogo, click on the TrustLogo product name you wish to purchase. This will present the following screen:

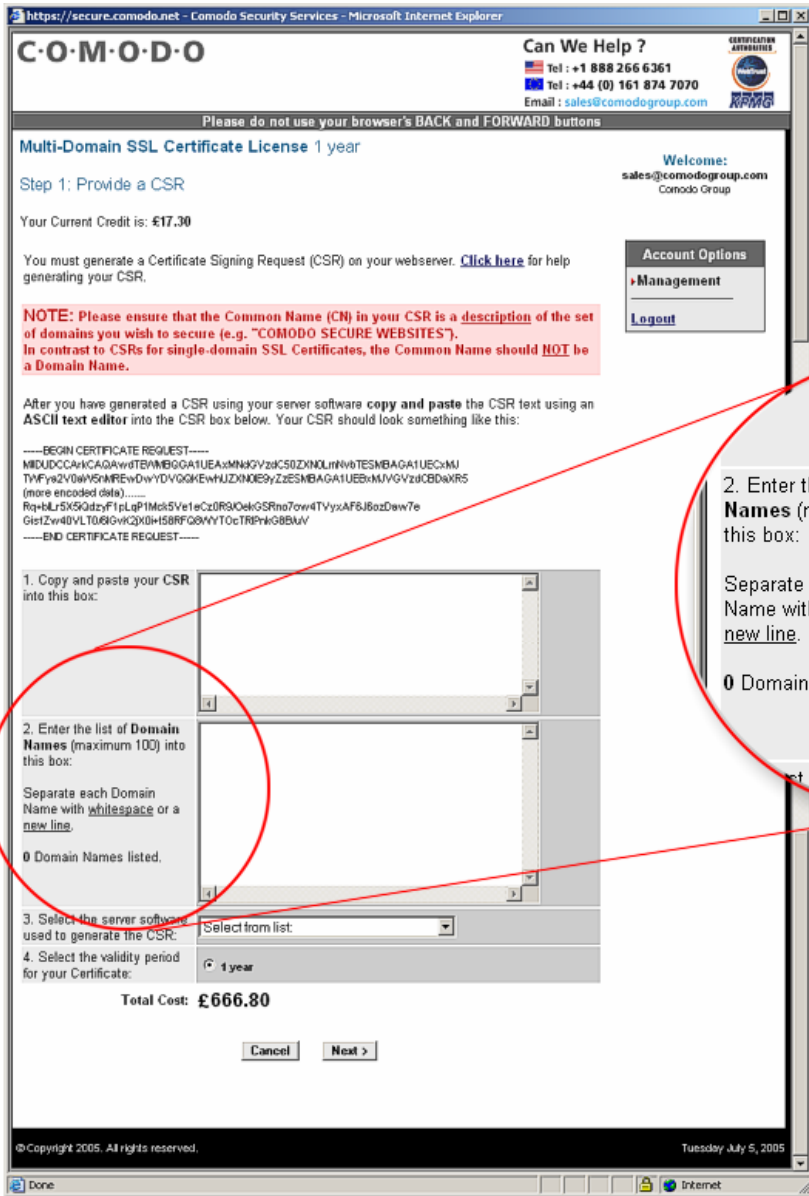

- a) Enter the customer's domain name in the following format:
 - ***.customersdomain.com/*** - use this format if you require your customer's TrustLogo to be valid of all pages on their domain name and all sub-domains on their domain name
 - **www.yourhostdomain.com/customersdomain/*** - use this format if your customer's site is hosted under your webhosts name, and the customer's company name is a subdirectory. The TrustLogo will be valid all pages within the specified subdirectory
 - Note: The * is critical - depending where it appears, it will specify that you require your TrustLogo to be valid on all sub-domains and / or all pages hosted on your domain name or within the specified subdirectories.
- b) Click next: Provide your customer's corporate details
- c) Click next: Choose the validity period for the TrustLogo

Note:

If you apply for both an SSL Certificate and a TrustLogo product for the same company for the same domain on the same day, you will be awarded the TrustLogo at the discounted price. Please refer to your Buy Prices for the discounted price.

To apply for a Multi Domain SSL Certificate:

- a) Generate a CSR for your customer's domain using your webserver.

NOTE: Please ensure that the Common Name (CN) in your CSR is a description of the set of domains you wish to secure (e.g. "COMODO SECURE WEBSITES"). In contrast to CSRs for single-domain SSL Certificates, the Common Name should NOT be a Domain Name.

- b) Copy and paste the CSR into the web form
- c) Add the list of domains you wish to include within the certificate
- d) Select from the list the server software used to create the CSR
- e) Provide your corporate details
- f) Ensure you confirm that you are authorized to host the domain names

Required fields are displayed in RED.

Company Details - These must be the Registered Address	
Issued to:	Comodo Secure Certificates
Company Name	Comodo CA
Dept	Web Host Admin Section
PO Box	
Address 1	Regents Place
Address 2	Regent Road
Address 3	
City	Salford
State	Manchester
Postcode	M5 4HB
Country	United Kingdom

I confirm that I am authorized to host all of the Domain Names that I have just listed.

Cancel & Start Again Next >

Adding/Modifying domains on a Multi-Domain SSL certificate:

To modify a domain within a Multi-Domain SSL Certificate it is necessary to replace the certificate as follows.

- 1) Run a report on your orders (The last option in the management interface (See page 3))

As you replace the certificate (To add more domains or rename domains then the order number will be incremented.

The screenshot shows the Comodo website interface. At the top, there is a navigation bar with the Comodo logo and contact information. Below this, a section titled 'Report on Your Orders:' displays a table of orders. The table has columns for 'ORDER #', 'Client Item(s)', 'Order Status Item Status', and 'COST'. The first row shows order # 367694repl#1, which is a 'Multi-Domain SSL Certificate (364 days, 10 of 40 Domains) for COMODO TESTING MDC CERT' with a cost of £0.00. A 'Replace' button is visible next to this order. A second row shows order # 367694, which is a 'Multi-Domain SSL Certificate (year, 40 Domains)' with a cost of £40.00. A third row shows order # 367694repl#1, which is a 'Multi-Domain SSL Certificate (year, 40 Domains)' with a cost of £40.00. A 'Replace' button is also visible next to this order. A red circle highlights the 'Replace' button for the first order. Another red circle highlights the 'Replace' button for the third order. A third red circle highlights the 'Replace' button for the second order. A fourth red circle highlights the 'Replace' button for the first order. A fifth red circle highlights the 'Replace' button for the third order. A sixth red circle highlights the 'Replace' button for the second order. Note:- IIS will require a new CSR for each installation. Apache based web servers are able to use the same CSR

Paying for Products:

Your account will be debited with the value of the product type and validity period selected upon application of the product. Upon receipt of the product application the product will be issued and emailed to your Web Host Account Administrator. Providing that the product application contains no invalid or conflicting data, SSL Certificates will usually be issued within 1 hour and TrustLogo products within 1 working day.

IMPORTANT - Your Responsibilities as a Web Host:

In order to make the product issuance process as fast and seamless as possible for immediate Certificate issuance, the Web Host has a number of responsibilities. It is your responsibility to ensure the following:

1. **Your customer is bona fide**
2. **Your customer has the right to use the domain name contained in the SSL application and / or the TrustLogo application (unnecessary unless you do not already host the customers website)**

You must only make applications on behalf of validated companies. Not validating your customers prior to making a Certificate could affect the warranty provided by Comodo. It is vitally important to validate your customer in accordance with the validation guidelines provided in appendix 1 of this document.

As a rough guideline, Comodo will validate a company by requesting Government issued documents such as the Articles of Incorporation, Business License, Company Number or DUNS number. For non-legally incorporated entities we require a copy of the Driving License or Passport of the applicant. This will possibly not be required if you already maintain a business relationship with the customer. For more advice please contact webhostsupport@comodogroup.com, we will be happy to assist you with any validations.

Please refer to Appendix 1: Validation Guidelines for Web Hosts for more information on how to validate a customer.

Managing Users:

Your Web Host Administrator (Super User) has the ability to add conduct all Web Host functions (purchase products, deposit funds, run reports on all transactions) and may add additional Users on a discretionary basis. Adding a User prompts the Super User to complete the new User details. By default the User will inherit the Super User's company address unless, optionally, a different address is required.

New User

Click to add a new User.

Amend User

Once a User has been added, they will be displayed in the User list. Select the User from the User list and click **Amend User** to change User details.

The screenshot shows a web browser window titled "New User - Microsoft Internet Explorer". The form is divided into two main sections: "User Details" and "User Address".

Purchase: Placing a tick in the Purchase column next to each product type (SSL Certificates & TrustLogos) dictates whether the user may buy these products.

Run Report: Placing a tick in the Run Report box allows User to run reports on all product types made by all Users.

Deposit Funds: Placing a tick in the Deposit Funds box permits the user to deposit additional funds into the Web Host account.

Refunds:

Please contact Comodo directly should you require a refund on a product.

Your Current Buy Prices:

Click the “View your Current Buy Prices” to display a summary table containing your current buy prices as set by your Account Manager.

Note that TrustLogo products will display 2 prices – one for “With SSL” and one for “Without SSL”. “With SSL” price will be awarded if a TrustLogo and an SSL Certificate are purchased on the SAME day for the SAME domain name and the SAME company name. “Without SSL” will price be charged if a TrustLogo purchase falls outside of the “With SSL” conditions.

Depositing Additional Funds:

Your Reseller Account operates on a prepayment system. You may top up your account at any time with additional funds by selecting “Deposit Funds”. Please note that the current user must have sufficient permissions as determined by the Administrator in order to deposit funds.

Also Becoming a Reseller:

As a validated Web Host you may also join the Reseller program without depositing additional funds. To add Reseller abilities to your account visit www.instantssl.com and follow the Partners link. Click on the Resellers link and then choose to Join the Program. You will then be prompted to either login or choose “New” – login and complete the 1 page form. Your account will then be updated with Reseller abilities.

Alternatively, you may follow the below link and sign up directly from here:

<https://secure.comodo.net/products/frontpage?area=reseller&ap=instantssl>

Promotional material:

Please visit <http://www.instantssl.com/ssl-certificate-support/reseller/promo/ssl-certificate-index.html> for a collection of promotional material and creatives that you may use under the license of your Web Host Agreement.

Getting Help:

Should you have any questions regarding your Web Host account please do not hesitate to contact our support department, we will be happy to assist you in any matter.

Appendix 1: Validation Guidelines for Web Hosts

In order to ensure the integrity of the trust infrastructure provided by Comodo through InstantSSL it is essential that members of the Web Host Programme operate under the following guidelines when issuing Certificates.

You must address two core areas prior to issuing a Certificate to a customer:

1. The customer has the right to use the domain name to be included in the Certificate
2. The customer exists as a responsible legal entity or individual

In most cases you will have a pre-established relationship with the applicant. This may include existing business relations established through the sale of products / services such as web hosting services or domain name registration.

In this event, the right of a customer to the domain name contained within the application will have been established – you will be hosting the domain name on behalf of the customer. It is therefore only necessary for to validate the existence of the customer as a responsible commercial entity or individual. If you have an existing business relationship with customer, this requirement may already have been fulfilled in the guise of payments / invoices paid by the end entity.

In the event that an existing business relationship does not exist, or you are not fully confident that the customer is sufficiently known to you, it is your responsibility to sufficiently determine their organisational / individual status.

To complete this validation, we recommend you request any of the following documentation from the customer:

If the Certificate is for a commercial entity:

- *Articles of Incorporation*
- *Business License*
- *DUNS details (e.g. your Dun & Bradstreet company number)*
- *Trading License*

If the Certificate is for a non-commercial entity:

- *Copy of your drivers license or passport*
